

Comfort & Energy Efficiency Start from the Roof Down

Experience a cozier home while saving on heating and cooling costs.

30 Watt
Solar ventilation

- ✓ Lifetime of energy savings
- ✓ Improve the comfort of your home
- ✓ Reduces moisture levels
- ✓ HVAC runs less, lasts longer
- ✓ Roofing stays cooler, lasts longer
- ✓ Improves home value

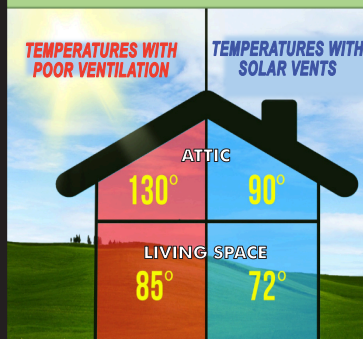

SYMPTOMS

UNCOMFORTABLE HOME
& HIGH ELECTRICITY BILLS

PROBLEM

THE ATTIC IS LIKE
A HOT OVEN!

Your Attic Needs 10 Full
Air Exchanges Per Hour

SOLUTION

SOLAR POWERED
ATTIC VENTS

Proper attic ventilation is essential for a healthy, energy-efficient home.

Without it, attic temperatures can hit 150°F, causing high energy bills, mold, and roof damage.

The Attic Depot solar fans remove heat and moisture using only sunlight,
keeping your attic cooler and your home efficient.

Pro-Series Attic Ventilation 30 Watt Solar Powered

The Attic Depot Pro-Series Features

- Whisper-Quiet Fan Blades
- Durable Brush-Less Motor
- Corrosion Resistant Finish
- Protective Wildlife Screen

Hail
Resistant

AUTO ON 35°F

AUTO ON 75% HUMIDITY

Certified

How many solar attic fans does my home need?

Use this chart to match up your attic square footage and height to determine the number of solar fans needed.

For example a home with a 1400 sq ft attic with 10' of attic height would require 2 fans.
